

1 SHEEHAN: Please wrap up Mr. Cooper.

2 COOPER: Yes. I think what needs to be really said here is we  
3 need to bring a sense of humanistic values back to the table. And to remember  
4 that erring on the side of caution has never proven an ill advised course of  
5 action and is certainly a more intelligent approach then the reckless abandon  
6 with which we have thus far embraced. Thank you very much.

7 SHEEHAN: Thank you. Cynthia Hildebrand? Cynthia? Not  
8 here? Richard Over?

9 OVER: Here.

10 SHEEHAN: And Mark Hesse?

11 OVER: My name is Richard C. middle initial Over, O-V-E-R.  
12 I purchased my property in 1953 from William Weller the developer of the  
13 Panorama Estates. That goes back a long ways and my wife and I consider  
14 ourselves the pioneers in that area. We purchased the property.

15 SHEEHAN: Could you state that property's address please, sir?

16 OVER: Pardon me sir?

17 SHEEHAN: State the address please. What is your address?

18 OVER: The address 21667 Mountsfield Drive.

19 SHEEHAN: Golden?

20 OVER: Golden, Colorado, 80401. I am in direct line of sight  
21 from all of the towers and since 1953 when there were only two towers up there.  
22 I've watched the development and in 1970 I established, I was a audiovisual  
23 technician teaching at Denver Community College. I established a small

1 business with my son called Over and Over Tape Duplication Service. I had  
2 contracts from a number of school districts in Colorado to duplicate reading  
3 tapes for those schools. I attempted to duplicate reading tapes and the  
4 interference I received from Channel 6 particularly was not acceptable and my  
5 business I had to abandon. I had hoped that business would help my son  
6 through college but the interference was so bad, the cross talk that I got on the  
7 tapes. I moved my equipment which I had purchased to the basement behind  
8 12 inch reinforced concrete walls and I still got interference. I called Public  
9 Service Company at that time and they sent engineers up and said that there  
10 was no way they could filter out the interference because a lot of it was coming  
11 in on the power lines. And it could just not be filtered out so I had to abandon  
12 the business. That's my main experience with the radiation that we were getting  
13 at that time. I don't really care about the business but I sympathize with the fact  
14 that there were seven families on the top of Mountsfield Drive right in front of my  
15 house that contracted cancer and a number of whom have passed away at that  
16 location. I can't prove, none of us seem to be able to prove that they were the  
17 ones that received radiation and caused that cancer but I sympathize with those  
18 things and I hope that you will take that into consideration when you make your  
19 decision. And I personally and as a past President of the Homeowners there in  
20 Panorama Estates I hope you will deny this application. Thank you.

21 SHEEHAN: Mark Hesse? Victor Holm and then Shelton, Marston  
22 Shelton?

23 HESSE: My name is Mark Hesse.
